TRANSPORT IS OUR BUSINESS - A DIVISION OF THE A. HARTRODT GROUP

Thermal blankets

food & beverage logistics is able to offer you re-usable thermal blankets. Our thermal blankets protect your temperature sensitive cargo by stabilizing the environment of the shipment and shielding it from extreme weather and temperature fluctuations.

What are thermal blankets?

- ✓ Thermal blankets are blankets with a certain insulation quality which are used to protect temperature sensitive goods against extreme heat or cold
- ✓ They minimize temperature fluctuations and flatten off temperature spikes during transport
- ✓ Perfect for goods like wine, beer, chocolate cookies, water, etc.
- ✓ Our thermal blankets are lightweight and are suitable for air & sea freight shipments
- ✓ The pallet cover can be used as a primary or secondary protection.
- ✓ The thermal blankets are designed for standard pallets

With a length of 120cm, width of 80cm and up to 200cm height our thermal blankets have the perfect fit for standard pallets.

Please do not hesitate to contact us for further information.
